

Appendix IV: The CAGE and the CAGE-AID (Adapted to Include Drugs)

Reference:

- <https://www.hrsa.gov/behavioral-health/cage-aid-substance-abuse-screening-tool>

The CAGE questionnaire, the name of which is an acronym of its four questions, is a widely used screening test for problem drinking and potential alcohol problems (alcoholism).

The CAGE-AID screening tool was adapted from the CAGE alcohol assessment tool to include questions about drug use. The target population for the CAGE-AID is both adults and adolescents and can be administered by patient interview or self-report.

These tools are not used to diagnose diseases, but only to indicate whether a problem might exist.

When thinking about drug use, include illegal drug use and the use of prescription drugs other than as prescribed.

C	Have you ever felt the need to cut down on your drinking or drug use?	Yes	No
A	Have people annoyed you by criticizing your drinking or drug use?	Yes	No
G	Have you ever felt guilty about drinking or drug use?	Yes	No
E	Have you ever felt you needed a drink or used drugs first thing in the morning to steady your nerves or to get rid of a hangover (Eye-Opener)?	Yes	No

Scoring:

A "yes" answer to one item indicates a possible substance use disorder and a need for further testing.

Two "yes" responses indicate that the possibility of alcoholism should be investigated further.
