

LIFT UP – ASES Foundation's 2026 National Shoulder and Elbow Week

May 11-16 2026

ASES Foundation's 2026 National Shoulder and Elbow Week is an opportunity to increase awareness nationally about the impact that shoulder and elbow health care has on our society.

A top priority for the **ASES Foundation** is to build financial channels for philanthropic donors to support the ongoing efforts of surgeon educators and researchers so that we may continue to provide high quality and cutting-edge care for our communities.

Continuing impact - The incredibly successful **2025 National Shoulder and Elbow Week** hosted events in 8 major cities generating over \$900,000 in funding from over 50 industry supporters. Thank you! 50% of net proceeds will go back to the local communities for shoulder and elbow research and education.

2026 National Shoulder and Elbow Week has selected 8 cities across North America to host events May 11 -16, 2026. These evening events are held at unique venues, with industry leading academic speakers, interesting guest speakers, and innovative industry products enjoyed by either recipients or providers of shoulder and elbow care.

Goals of ASES Foundation's LIFT UP National Shoulder and Elbow Week are:

- Promote prevention of shoulder & elbow injuries
- Disseminate information to patients about shoulder and elbow surgeons and their work
- Build a network of shoulder and elbow health professionals in local communities
- Learn latest discoveries, innovative treatments and products in shoulder & elbow surgery

Attendees are comprised of all reaches of the profession from patients, local community leaders, industry partners and local community providers including top surgeons, therapists, PAs, and nurses. Over 900 attendees will connect and learn about the latest advancements in shoulder and elbow care through educational sessions and discussions.

History: The 2021 **National Shoulder and Elbow Week** was the first and held at five locations. It is organized and managed by the ASES Foundation's Committee on Patient Centered Initiatives. The committee's mandate is to engage patients which is primarily accomplished with National Shoulder and Elbow Week and educate them with patient-centered materials on the ASES Foundation website.

Industry Partners make **National Shoulder and Elbow Week** possible through their generous support. Consider being a national sponsor across all 8 locations. [Sponsor here.](#) ASES members, support our profession by [attending](#) a local event or [donating](#).

2026 Host Locations & Information
